Jared Jacob Rojas Barrón

IT Operations & Support Specialist

Guadalajara, Jalisco, México

Extracto

Pro-active IT Professional & Information Technology Student with a solid background in software development and IT infrastructure management. Currently specializing in IT Operations and Cloud Administration, I manage user identities through Microsoft Azure (Entra ID) and optimize hardware lifecycles using GLPI.

My experience ranges from hands-on hardware troubleshooting to the strategic management of IT assets and user onboarding processes. I am passionate about automating workflows and ensuring high-quality service delivery through effective communication with cross-functional teams like Human Resources.

Core Expertise:

Cloud Administration (Azure, MFA, Identity Management).

IT Asset Management (ITAM) & Inventory Control (GLPI).

Technical Support (L1/L2) & Troubleshooting.

Process Improvement & Stakeholder Communication.

Experiencia

DEIOT

2 años 4 meses

IT Operations & Support Specialist

diciembre de 2025 - Present (4 meses)

Guadalajara, Jalisco, México

Identity & Access Management: Managing users in Microsoft Azure, including password resets, license assignments, and MFA activation.

Asset Management: Overseeing hardware and software inventory using the GLPI platform.

Onboarding & Compliance: Coordinating with HR for new hire equipment setup (standard user images) and managing legal delivery receipts (responsivas).

Advanced Tech Support: Delivering high-quality customer service and technical troubleshooting for complex hardware and software issues.

IT Support

diciembre de 2023 - diciembre de 2025 (2 años 1 mes)

Guadalajara, Jalisco, México

I am currently dedicated to technical support for companies, handling user reports, OS repairs, application repairs, error registration and reporting, equipment administrator, basic level cybersecurity management, user administrator, Microsoft Azure management, computer equipment maintenance, and Office 365 package management.

Autónomo

Freelance

septiembre de 2019 - diciembre de 2023 (4 años 4 meses)

Guadalajara, Jalisco, México

In this role, I worked independently for various companies and clients. I developed skills in Arduino and electrical circuits, programming languages such as CSS, C#, JavaScript, HTML, PHP, and SQL, and I also performed preventive and corrective maintenance on computer equipment. I was proficient in operating systems such as Linux, Windows, macOS, Android, and iOS, and managed home networks, including configuring access points and routers.

I was also skilled in installing basic programs like Microsoft Office and web browsers, as well as more specialized programs such as Adobe suites and AutoCAD.

Papeleria Tony

Auxiliar de almacén

mayo de 2023 - agosto de 2023 (4 meses)

In this temporary position, I developed the activities of inventory management, continuous improvement, area arrangement, communication with clients, fulfillment of customer orders, delivery of material to stores, unloading of trucks

with material, arrangement of materials, handling of computer equipment and applications for product registration.
