CORE SKILLS

Microsoft Azure (Entra ID) · Active Directory · Identity & Access Management (IAM) · GLPI / IT Asset Management · Technical Support (L1/L2) · Cybersecurity Fundamentals · Web Development (JavaScript, PHP, Python) · Automation with Excel/VBA and Google Apps Script

SUMMARY

IT Professional & Information Technology graduate with a solid background spanning cloud administration, IT infrastructure management, and full-stack software development. I manage user identities and access through Microsoft Azure (Entra ID) and optimize hardware lifecycles using GLPI, while also building custom web systems that solve real operational problems — from AI-powered support platforms to inventory, finance, and workspace management tools.

My experience ranges from hands-on hardware troubleshooting and cybersecurity fundamentals to the strategic management of IT assets and user onboarding processes. I am passionate about automating workflows and ensuring high-quality service delivery through effective communication with cross-functional teams like Human Resources.

Core Expertise:

- Cloud Administration (Azure, MFA, Identity Management).
- IT Asset Management (ITAM) & Inventory Control (GLPI).
- Technical Support (L1/L2) & Troubleshooting.
- Custom Software & Web Development (JavaScript, PHP, Python).
- Process Improvement & Stakeholder Communication.

EXPERIENCE

DEIOT

2 years 8 months | Guadalajara, Jalisco, Mexico

Senior IT Operations & Support Specialist

December 2025 - Present (8 months) | Hybrid

- Identity & Access Management: managing users in Microsoft Azure, including password resets, license assignments, and MFA activation.
- Asset Management: overseeing hardware and software inventory using the GLPI platform.
- Onboarding & Compliance: coordinating with HR for new hire equipment setup (standard user images) and managing legal equipment liability waivers.
- Advanced Tech Support: delivering high-quality customer service and technical troubleshooting for complex hardware and software issues.

IT Support

December 2023 - December 2025 (2 years 1 month) | On-site

Technical support for companies: user reports, OS repairs, application repairs, error registration and reporting, equipment administration, basic-level cybersecurity management, user administration, Microsoft Azure management, computer equipment maintenance, and Office 365 package management.

Freelance

September 2019 - December 2023 (4 years 4 months) | Guadalajara, Jalisco, Mexico

Worked independently for various companies and clients. Developed skills in Arduino and electrical circuits, and in programming languages such as CSS, C#, JavaScript, HTML, PHP, and SQL, alongside preventive and corrective maintenance on computer equipment. Proficient across Linux, Windows, macOS, Android, and iOS, managing home networks including access points and routers, and installing programs ranging from Microsoft Office to Adobe suites and AutoCAD.

Papelería Tony — Warehouse Assistant

May 2023 - August 2023 (4 months)

Inventory management, continuous improvement, area arrangement, communication with clients, fulfillment of customer orders, delivery of material to stores, unloading of trucks with material, arrangement of materials, and handling of computer equipment and applications for product registration.

PROJECT EXPERIENCE

- IT Inventory System — asset management system for IT equipment (computers, monitors, headsets, kits, etc.), with dashboards for users, equipment, and monitors, a dedicated dashboard for the area manager, QR code generation per device, and multi-sheet Excel export. Built with HTML, JavaScript, and CSS, using the SheetJS library for exports.
- MezSpace — workspace booking system built for a multi-tenant office, allowing each client company to reserve and manage its own office space and usage time. Built with HTML, CSS, and JavaScript, deployed on GitHub Pages.
- CoreDesk — AI-powered ticketing platform where users chat with an AI trained for IT support; it resolves common issues autonomously and escalates unresolved tickets to human agents, learning from each case. Built in Python with Streamlit, integrating Google's Gemini AI, and deployed as a live web app.
- LDAC — user management and analysis system for a clinical laboratory, allowing the client to track patients over time with reports and clinical history. Built with HTML, JavaScript, and CSS, using a Google Apps Script backend synced to Google Sheets as the live database.
- MiyTusFinanzas — personal finance web app with charts for upcoming payments, payment recommendations, and Excel export. Built with HTML, JavaScript, and CSS, using Chart.js for visualizations and a Google Apps Script backend synced to Google Sheets, with localStorage caching.
- PagoTrack — payment management system for an accounting department, allowing users to manage vendor payments and invoices, with Excel export. Built with HTML, JavaScript, and CSS, using browser localStorage for data persistence.
- Portfolio — single-page professional portfolio site showcasing an experience timeline and featured projects. Built as a single HTML file with CSS and JavaScript, hosted on GitHub Pages.

EDUCATION

Centro de Enseñanza Técnica Industrial

Software Development Technologist, Computer Software Technology/Technician · (August 2018 - December 2021)

Universidad de Guadalajara

Bachelor's Degree in Information Technology · (January 2022 - June 2026)

LICENSES & CERTIFICATIONS

Introduction to Cybersecurity

Cisco

Introduction to IoT

Cisco · Issued: May 2021

AWS Academy Graduate — Machine Learning for Natural Language Processing (Training Badge)

Amazon Web Services (AWS)

AWS Academy Graduate — Machine Learning Foundations (Training Badge)

Amazon Web Services (AWS) · Issued: March 2026
